

BLACKFIELDS
FURNITURE

We design and manufacture high quality furniture pieces, for both private and commercial sectors. By combining our traditional training with our enthusiasm for technology we are able to deliver cutting edge design with a very high level of quality for our clients.

With over 30 years combined experience, blackfields furniture sets the standard for quality furniture in Bristol.

We specialise in bespoke, handmade furniture for both private and commercial sectors

Our team has a variety of skills allowing us to design, build and manufacture all in house. Our workshops, alongside our skilled team of cabinet makers and joiners, allow us to offer a wide range of services including CNC cutting and an in-house finishing shop with spray booth capacity. We have a passionate, dedicated workforce who pride themselves on making sure the whole process from surveying to fitting and snagging is professional & executed to the highest standards we uphold.

Working in the commercial & private sectors for many years has developed our company to meet a wide range of requests, from a high-end commercial joinery contract for offices, hospitals or schools to working with designers, architects & construction companies on higher end home renovations and interior joinery fitouts in private houses.

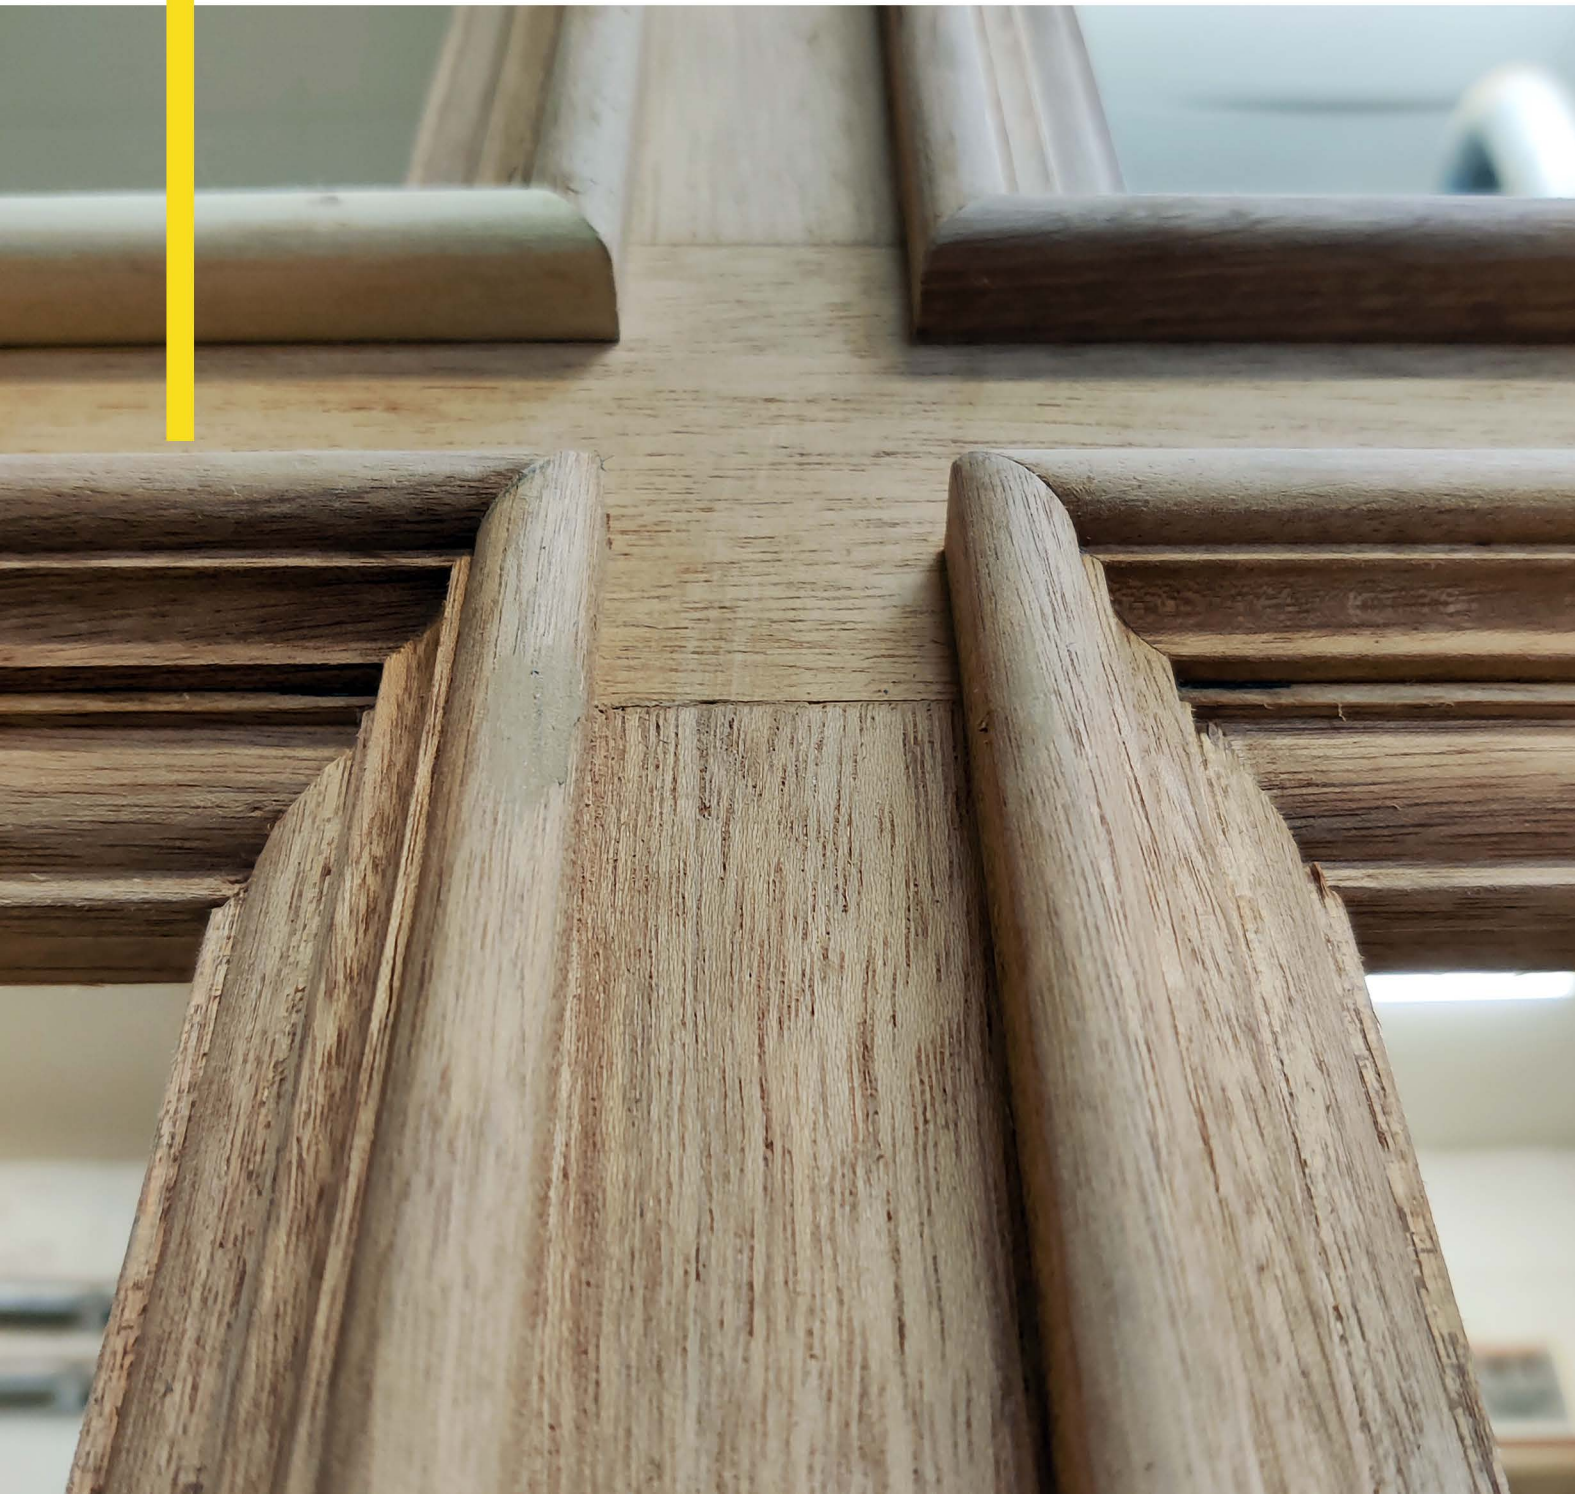

We have vast experience in a range of commercial projects and are well equipped in managing clear lines of communication around lead times and ensuring our quality never suffers due to high quantities or tight timeframes. We offer a range of services and products which are both built to last and offer value for money. Our team are experienced with regulations within the commercial world, and all staff members have relevant training and certification work in these environments.

Commercial clients have high expectations and our experience with delivering high end products and services are critical to ensure all large scale projects run smoothly throughout all stages of development.

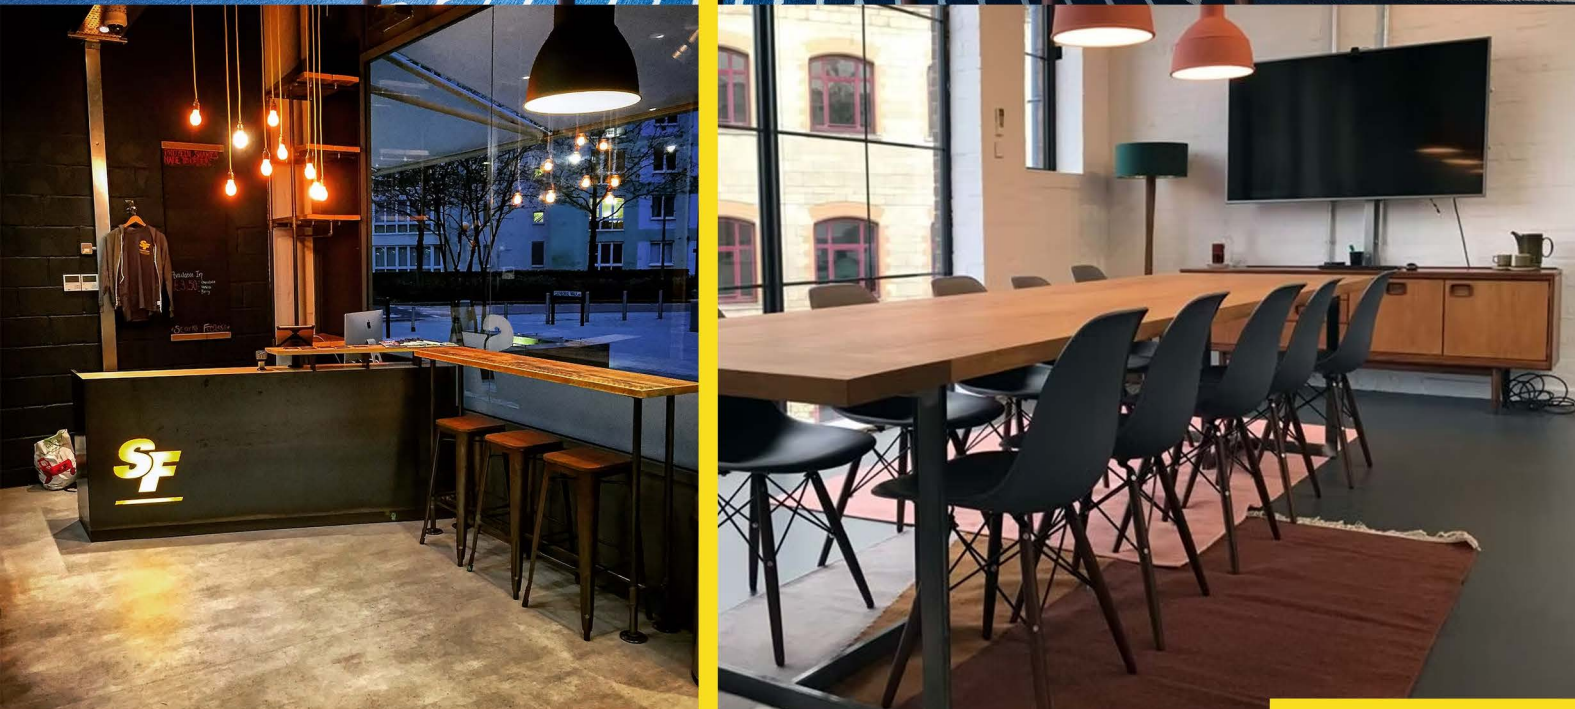

DETAILS

A CLOSER LOOK...

Pictured below in African Sapele, this front door is handcrafted in our Bristol workshop with precision techniques and traditional joinery, delivering the craftsmanship our clients value.

Shown here in seamlessly jointed birch plywood, this shelving unit was handmade in our Bristol workshop as part of a larger commercial project for Bristol University. This project was crafted using our dimension saw and bonded in a clamp jig we constructed just for this single project.

Commercial Works & Joinery

We have vast experience in a range of commercial projects and are well equipped in managing clear lines of communication around lead times and ensuring our quality and production does not suffer due to quantity or and we offer a range of services and products which are both built to last and offer value for money. Our team are experienced with regulations within the commercial world, and all staff members have relative training and certification work in these environments.

Commercial clients have high expectations and our experience at delivering high end products and services are critical to ensure all large scale projects run smoothly throughout all stages of development.

Kitchens

Blackfields started out designing and manufacturing bespoke kitchens, the business grew from the experience we gained from working in the high-end kitchen world for many years, it's where our passion for craftsmanship stemmed from.

Our experience has developed over countless projects that we can now offer a huge range of possible designs and use innovative machines and techniques to create truly exceptional kitchens which suit a range of styles, needs and budgets.

Media Walls

We have further expanded our repertoire to offer a variety of interior joinery projects such as media units, utilising new materials, design, and lighting to create spectacular media walls which are both beautiful and practical.

Most media wall projects start with an idea from the client, then our design team works with the client to make those ideas a reality whilst ensuring they are also practical and can be installed and fitted to a high standard.

Reception Desks

Our expertise in commercial reception desks have enabled us to utilise a wide range of materials such as glass, powder coated metal, solid surface, laminates, and upholstery.

We can offer this knowledge to clients as part of the design phase to ensure the end product is not only efficient but also a stand out piece of design enhancing whatever space it resides in.

Smart Storage

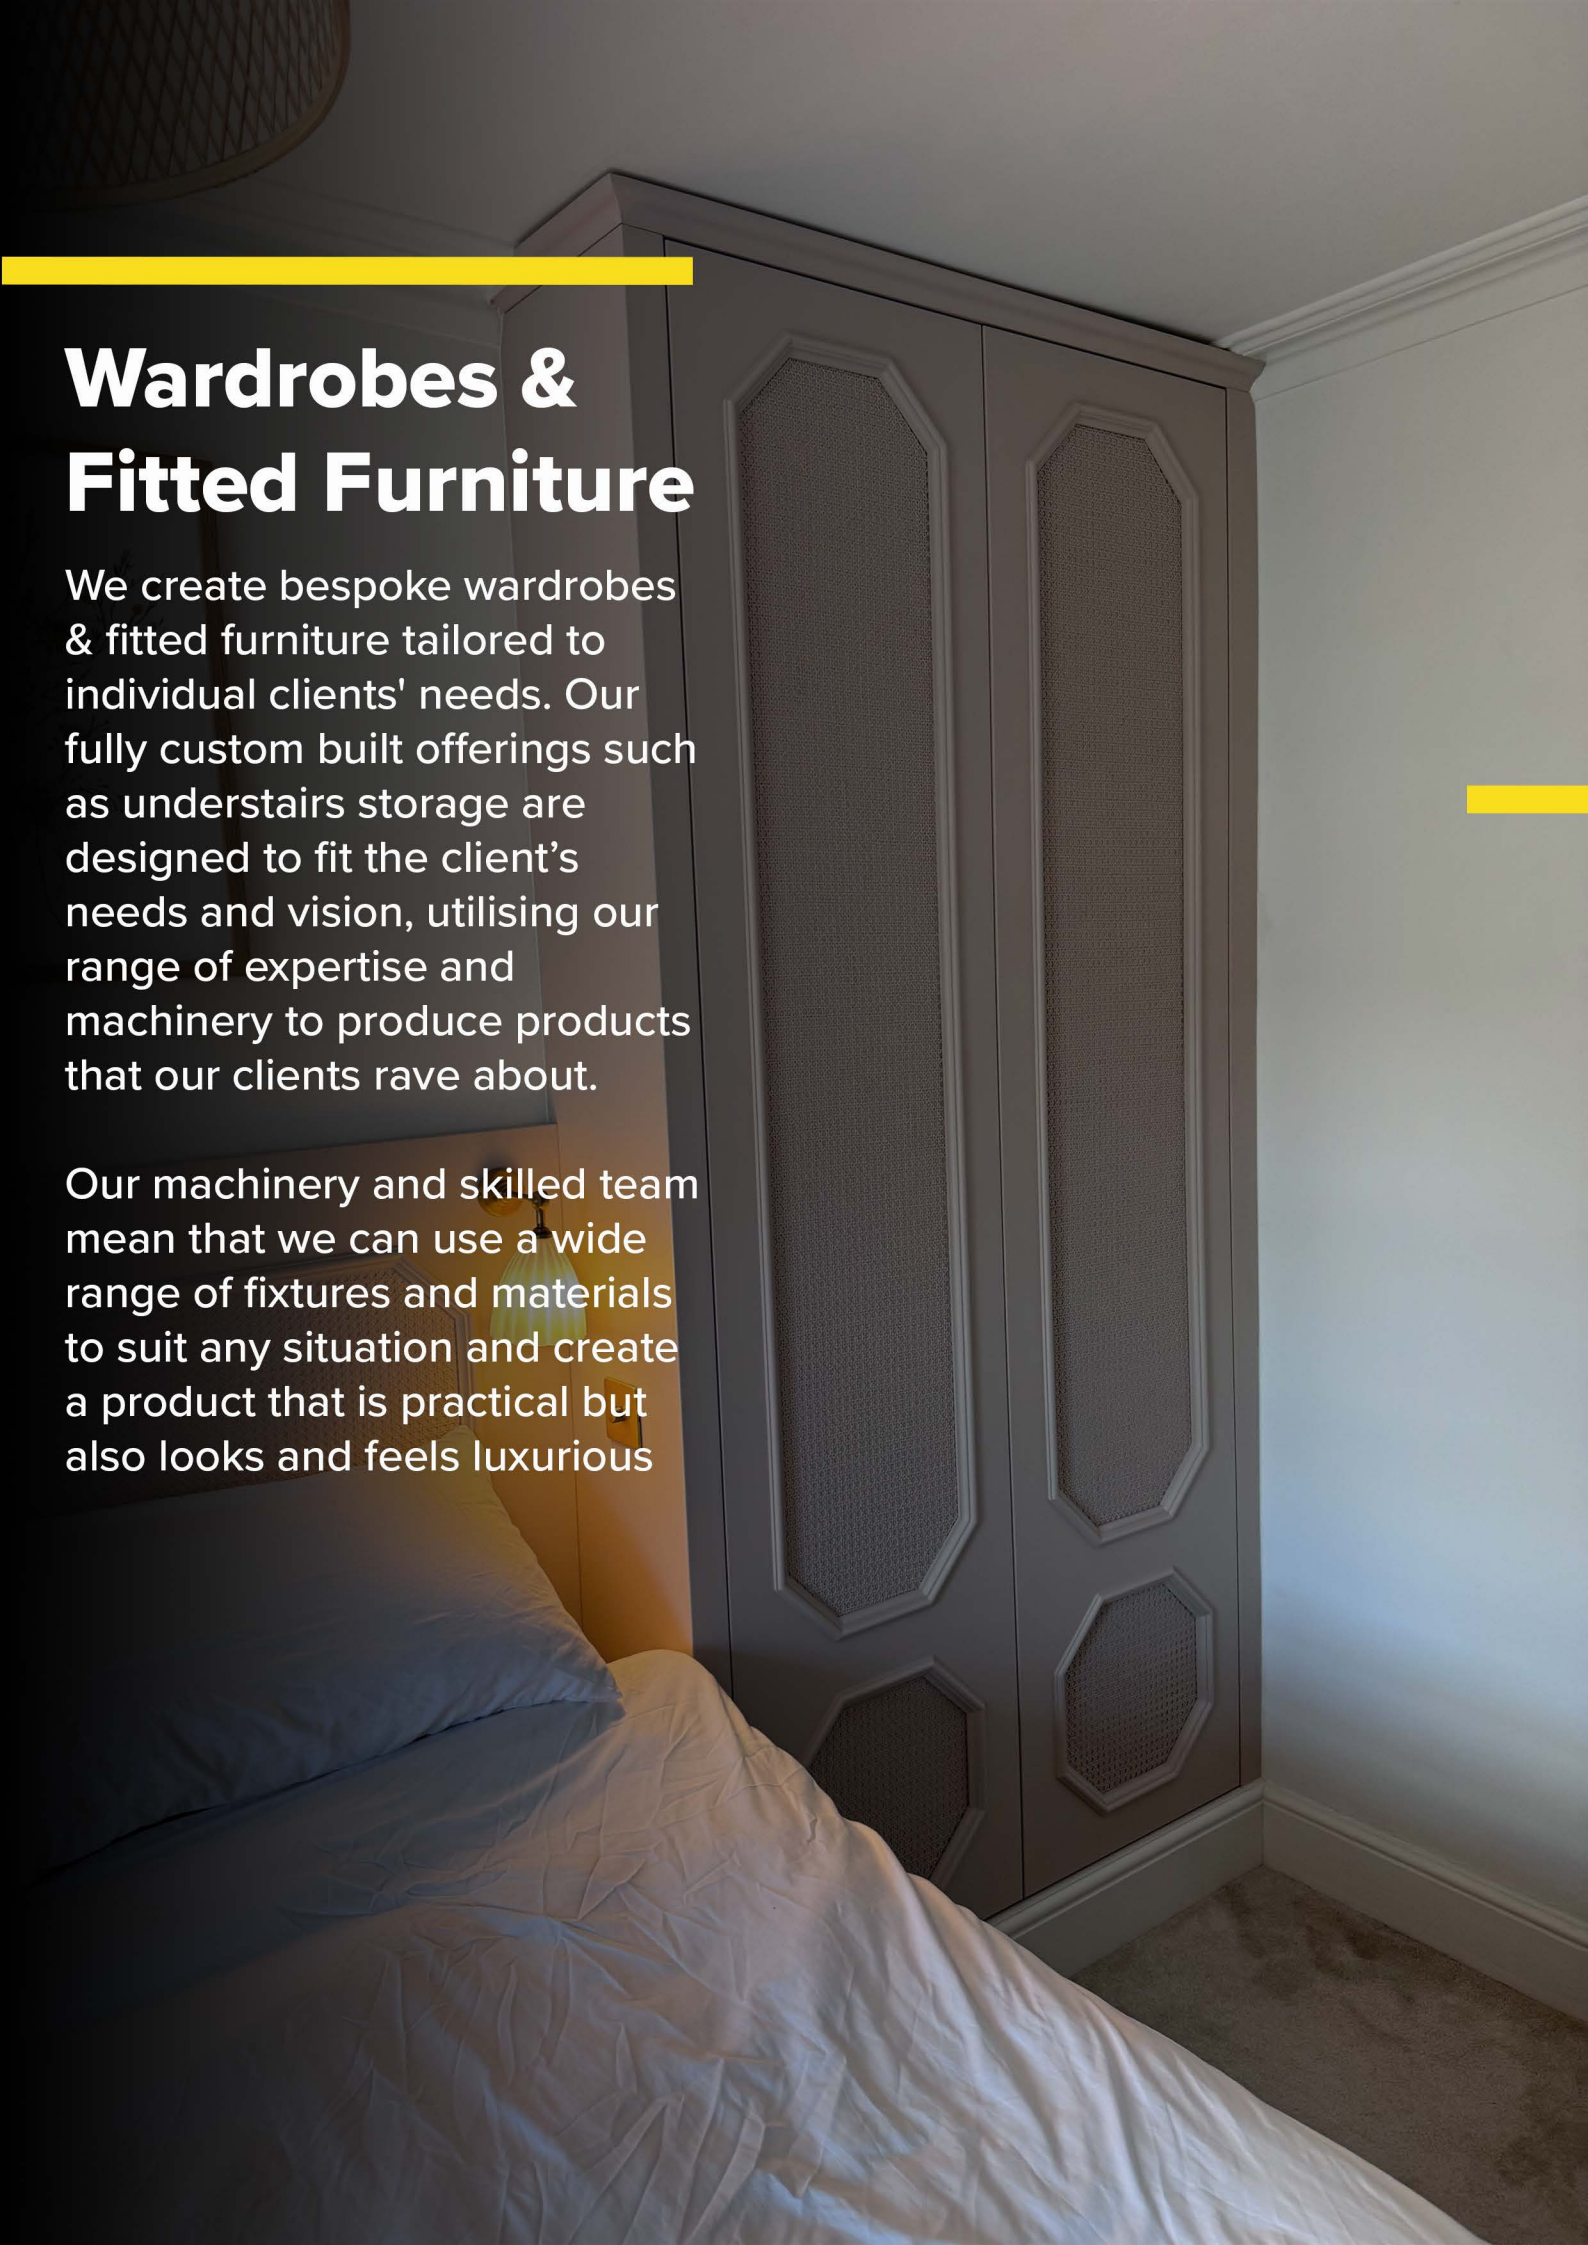

Smart storage is a service we offer that can be truly bespoke, as our belief is that storage should be tailored for your needs. We work closely with clients to ensure that we understand the purpose, design needs and situational placement to ensure all products created have a long-life span and work for you, the client.

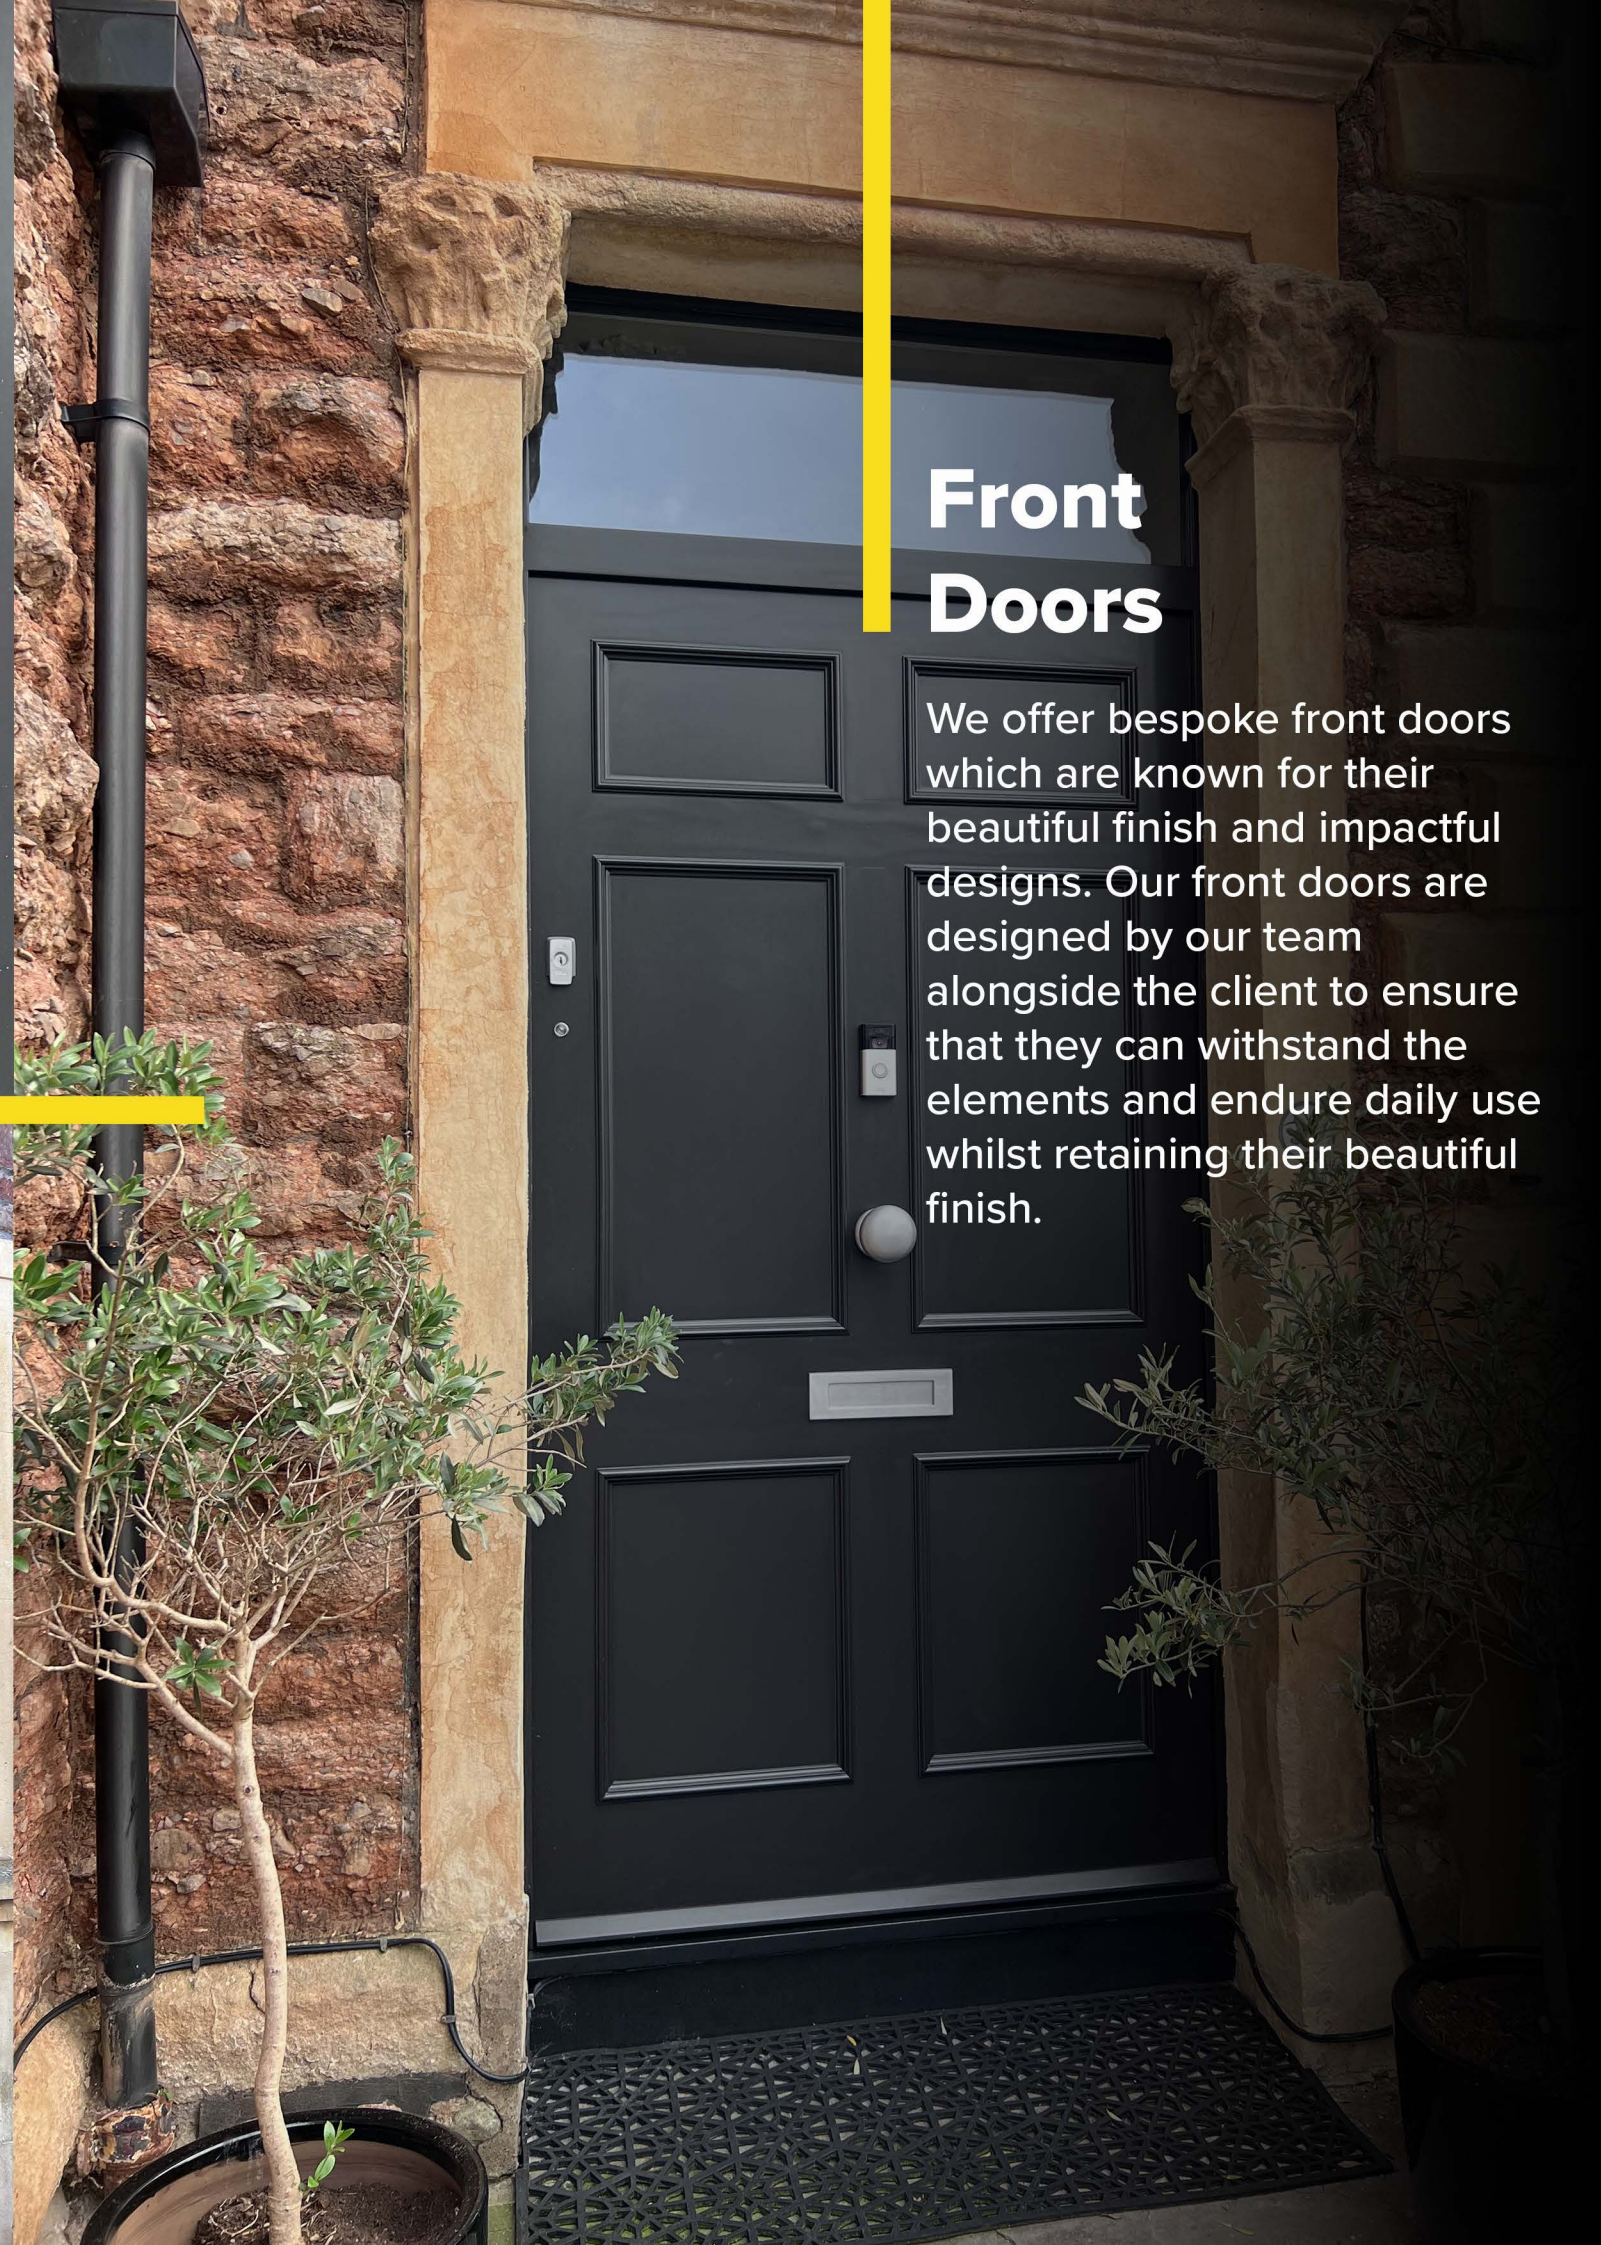

Material options are endless, from hard wearing laminates and ABS edging to sprayed products and bespoke wood finishes which we can create in house.

Wardrobes & Fitted Furniture

We create bespoke wardrobes & fitted furniture tailored to individual clients' needs. Our fully custom built offerings such as understairs storage are designed to fit the client's needs and vision, utilising our range of expertise and machinery to produce products that our clients rave about.

Our machinery and skilled team mean that we can use a wide range of fixtures and materials to suit any situation and create a product that is practical but also looks and feels luxurious

Front Doors

We offer bespoke front doors which are known for their beautiful finish and impactful designs. Our front doors are designed by our team alongside the client to ensure that they can withstand the elements and endure daily use whilst retaining their beautiful finish.
